

ArenaKleen FAQs

Is ArenaKleen non-hazardous and completely harmless to my horse or me?

Yes, ArenaKleen is non-toxic, non-hazardous, and will not hurt, people, plants, or aquatic life.

Can ArenaKleen be used on any equestrian footing?

Yes, ArenaKleen is compatible for use as a dust control solution on all types of soil and soil blends as well as soil/fiber blends, both natural and synthetic.

Will the arena footing remain consistent if ArenaKleen is applied?

Yes, in fact an application of ArenaKleen will actually keep your arena footing consistent longer because it remains active in the soil for a very long time maintaining the same “feel” for many months.

I'll never have to water once I use ArenaKleen?

Correct, ArenaKleen requires no water for application and once applied it remains active in the soil so that watering becomes unnecessary.

Does ArenaKleen change the consistency of the footing in any way?

ArenaKleen makes the footing material feel very slightly damp (not wet) and will maintain this feel or consistency indefinitely once all of the footing has been wetted with ArenaKleen.

ArenaKleen will not freeze during cold weather?

ArenaKleen never freezes.

Does ArenaKleen have any corrosive effects on equipment?

ArenaKleen is completely non-corrosive.

Does ArenaKleen contain any salt or chlorides?

ArenaKleen has no chlorides or salts.

How is ArenaKleen applied?

ArenaKleen may be applied with any equipment that could typically be used to apply water. It is sprayed onto the surface and immediately begins to soak in.

How soon can I use my riding area after application of ArenaKleen?

Because ArenaKleen is non-hazardous and is not sticky or slippery the riding area can be used immediately after application with no negative effects.
