

MAKE THE JUMP TO ARENAKLEEN SAFE, EFFECTIVE, ORGANIC DUST CONTROL

Everyday horses, riders and trainers are exposed to unhealthy levels of dust. Besides creating uncomfortable riding conditions, continued exposure to dust can cause respiratory problems for humans as well as animals. According to researchers from Colorado State, Pennsylvania State (PSU) and East Carolina Universities, dusty riding surfaces were the primary cause of respiratory illness in the equestrian community.

ARENAKLEEN-NO MORE DUST!

ArenaKleen is the all natural, environmentally safe dust control solution that eliminates this health risk. With ArenaKleen dust suppressant, horses, riders and trainers can work safely and comfortably in the arena, stables or anywhere dust is a problem. Our proprietary blend of high-tech clear, odorless organic fluids are highly purified and proven safe for humans and animals.

And ArenaKleen stops dust, not for days or weeks but all season long. Imagine a season of dust free performance. Plus, when it's time to re-apply it is done at a much lower rate insuring cost effective,

long lasting dust control. Watering is never required and climate or humidity is not a factor.

ARENAKLEEN-RIDES LIKE DRY!

Most dust treatments just coat the dust particles. ArenaKleen works differently. ArenaKleen is formulated to absorb into each individual soil particle. This means that soil particles remain in direct contact with each other insuring firm footing, excellent traction with no stickiness, thus no tracking.

ARENAKLEEN-MAKE THE JUMP!

ArenaKleen is solving dust problems at more and more equestrian facilities – ask us why. If you're looking for better air quality, a healthier environment and the added benefit of improved footing call us at 1-888-606-6108.
